Greenhouse Shade Net

Double Plastic® Greenhouse Shade Net made in China factory is manufactured of 100% virgin HDPE with high resistance to tensile, corrosion and high temperature.

Greenhouse Shade Net helps to control natural temperature, light and moisture, protect crops from UV rays, rain shock and high winds, and ensure optimal yield and quality of crops and other plants.

• Product Description

Double Plastic® is an enterprise engaged in the research and development of China greenhouse shade nets . It mainly sells various types of sunshade nets and other products. In recent years, we have continued to learn new shade net production technology and applied it to product production, and achieved many achievements such as improving product quality and expanding product categories.

We also support customized specifications such as colors,sizes,needl and woven processes. Timely delivery and factory direct affordable rate are available.
